

ARTEMIS-IA Working Group Standardization

October 07, 2015 in Torino

J. Affenzeller, L. Gide

Advanced Research & Technology for Embedded Intelligence and Systems

Starhotels Majestic
Room: Eleonora
Corso Vittorio Emanuele II no. 54
Turin, Italy

09:30 am – 12:00 pm

- ▶ 09:30 – 09:45 Introduction of the WG Standardization and there links to the CP-Setis Project (J. Affenzeller)
- ▶ 09:45 – 10:35 CP-Setis: Sustainable Structure for IOS Standardization (J. Niehaus)
- ▶ 10:35 – 11:00 Success Stories on Standardization – Transferring European research results to standards (E. Schoitsch)
- ▶ 11:00 – 11:30 Discussion and next steps (all)

Investigation Results – performed March – May 2014

- ▶ Questionnaire send out to 51 persons
- ▶ We got response from 15 persons

Expectation from responsible project partners

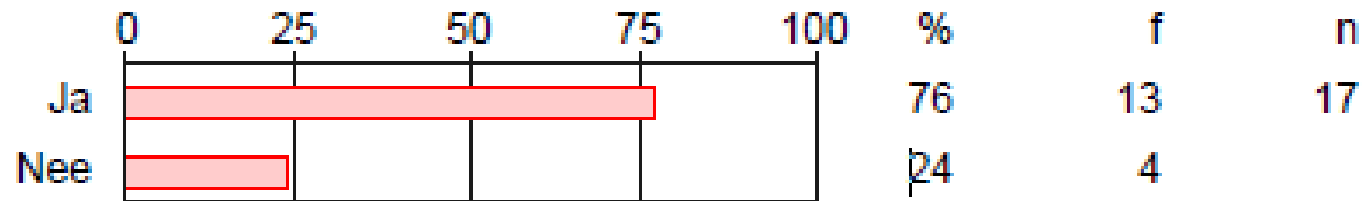

- ▶ Support on Standardization activities in other projects (ARROWHEAD)
- ▶ Increase of standardization issue and policy inside ARTEMIS
- ▶ More information about standardization bodies or groups, also about processes
- ▶ Information about standard methods, tools and technics among European countries
- ▶ Standardization is mandatory however most of the time it is lead by economical issues and not technical issues

Expectation from responsible project partners

► Sharing of information among participants

The project relates to standardization in the perspective that it was decided to follow the work of cen-clc-etsi Smart Grid Coordination Group and use the proposed reference models

ARTEMIS IA

Standardization WG

Standardization WG - Targets eg.

- SRA Updates – standardization process
- Promoting standardization within projects and partners
- Dissemination activities

CP-Setis Project

CP-Setis – Targets eg.

- Support of the WG Standardization
- Integration of Standardization bodies in the iOS activities
- Promotion of iOS
- SRA for WG
